Hitt Marking Devices

The Hitt Family

How We Began

Dear Customer,

The following letter was written several years ago and presented to Harold Hitt, President, by his father at an awards banquet. We felt it was worth sharing and believe it will provide you with some insight into how Hitt Marking Devices began.

In keeping with the all American dream, for sometime our son Harold, together with his wife Heidi, had been looking for a business they could establish where they would "be their own boss." In 1987 they came to my wife Dottie and me, with a proposal. It wasn't a proposal to borrow money from us to start their dream business. What Harold proposed was a true partnership where he and Heidi would match our investment and we would start a Rubber Stamp Business." He suggested that this business be started in my garage using some old outdated equipment donated to the cause by Heidi's mother, who owns and operates a rubber stamp business in Hemet, CA.

The plan was that Dottie would make the stamps. Harold and Heidi would function primarily in sales. We agreed to the plan and the family business, **"HITT MARKING DEVICES"** was begun. The company grew quickly and it wasn't long before Harold, Heidi and Ken had to quit their jobs, and come into the business full time to assist Dottie in manufacturing and sales. Harold and Ken made sales calls and deliveries in the morning, then rushed back to help Heidi and Dottie manufacture, invoice and ship out the daily orders. Also as a result of the company's rapid growth, it wasn't long before they were bumping into each other in our garage. Harold began looking for a more suitable location, in the Orange County area. In addition to the fact they needed more space, Harold confessed to being embarrassed to tell his customers that he was operating out of "a garage."

We truly stepped out on faith, but hedged that faith at Harold's direction, by moving into the same general area where several large national and international corporations had established their home offices. New product lines were added such as: specialty inks, stone stamp pads, fingerprint pads, engraving, plaques & awards, stencils, labels, electric time recorders, electric branding machines, etc. It truly became a marking device business, instead of merely a rubber stamp business.

We were recently awarded **HEAVY WEIGHT SUPPLIER OF THE YEAR** by Marking Industry Magazine. Harold has made it clear that he isn't going to be satisfied with being just another marking device company. He wants to be the best and the biggest. He is committed to offering the best in service, together with a quality product which is competitively priced. We are not the biggest yet but we are the best, thanks mostly to Harold and the dream that he held onto and sacrificed to achieve. Also, thanks to Harold's philosophy of providing both quality and good service, and the efforts of our youngest son Ken, our company, Hitt Marking Devices was awarded Nordstrom Department store's **"SUPPLIER OF THE YEAR"** award. Since Nordstrom is considered to be a leader in both quality and service, this was no small accomplishment. We are grateful to Ken for making it happen. Ken, who entered the business in late 1988, has be-

come an invaluable member of Hitt Marking Devices family team, as demonstrated by this award.

One of Harold's stated goals from the very beginning has been to provide a source of income for his dad and mom's retirement. That goal has now been achieved much earlier than we ever dreamed it could.

This award given this 14th day of December, 1993, by his proud parents, Don and Dottie Hitt.

In the years since this letter was written, Don and Dottie have retired to Washington State. Heidi is a stay at home mom with two children. Harold, President and Ken, Vice President still remain involved in day to day operations.

"If you're in the area we invite you to come by and see us."

HEAVY METAL DATERS THAT ARE ECO-FRIENDLY TOO?

THAT'S THE Shiny® VALUE

Heavy Metal ecoLine

DATERS MADE WITH PET - 12 Year

Our Heavy Metal Line is sure to please the most demanding customers. We minimized plastic and maximized metal with this new design. The majority of remaining plastic is made from recycled PET, so using Shiny HM daters helps reduce waste in landfills. Yes, these are Heavy Metal (HM) Daters as the name implies, but super smooth oscillations make them easy to operate. Tested for over 1,000,000 impressions, the most demanding customers will never wear them out. Take comfort in knowing that the HM Daters are Eco friendly as well.

Alphabet Stamps are ideal for stamping any combination of numbers or letters. Bands are quickly revolved with knurled wheels. For regular or industrial inks.

Ordering Instructions:
Specify total number of bands wanted. Show size and style number. Submit copy or sketch showing position of alphabet and figure bands in stamp. Also available are Alphanumerical bands, which contain alphabet and figures on each band.

Pullman Numbering Stamps

Figures are shown actual size so you can determine maximum number of bands for a given width. Suppose that you want to stamp 8 interchangeable characters in a line so that the stamped impression is approximately 3" wide. Reading down the 3" line in the scale below, you find that the number 4 size Gothic stamp has 8 characters in that width. Therefore, you should order a JB 4-8. Need a special layout? We can add letter bands (A-M or N-Z) or a custom band in any position to meet your requirements. Ask for details.

Shaded area indicates sizes and number of bands available on self-inking stamps (bands on No. 3 size conventional self-inking stamps contain 11 characters.) All sizes shown are available as manual stamps.
* No. 4 Self-Inking Stamp is available in BDA Style only.

SIZE & STYLE	CHAR. SIZE	MAX. NO. OF BANDS — REG.	MAX. NO. OF BANDS — SELF-INKER
00 Gothic	1/16'''	21	20

To Order:

1. Specify overall impression size. Example: 1/2 overall impression.

   Note: When measuring stamp for the overall impression size, be sure to measure the longest possible dimension.

   For Example:

   R wrong   R correct

2. If numbered, specify numbers desired. (Example: 1 thru 50)

3. Provide us with a sketch of your needs. Example:

   ABC   thru   10 ABC

4. If special logo is required, please provide camera ready art. (One time pattern charge applies.)

Stone Stamp Pads

Stone Stamp Pads

This is the only stamp pad that can be used with solvent/acid based industrial marking inks without destroying the pad. A constant flow of ink from the porous stone helps create high quality, non-smear impressions.

• Sizes: #1, #2 & #3

Industrial Ink

Steel Hand Stamps
Mark-Hitt Electric Branders

Model WB200
200 Watts, 120 or 220 VAC

Use the Model WB200 where lower branding temperatures are required.

Depending on the branding head size, temperatures of 700ºF to 920ºF are possible making the WB200 suitable for continuous low-volume branding of many softer materials such as leather, some plastics, and soft woods.

Although a good basic branding tool, it is not recommended for fast and repetitive production line applications as the tool's heat-generating capability is limited for such uses. See WB300 and WB400.

Model WB300
300 Watts, 120 or 220 VAC

With branding head temperatures that are 150ºF to 200ºF hotter than the WB200, this model performs well in the middle temperature ranges. Harder woods and many rubber products can be branded easily.

Model WB200
400 Watts, 120 or 220 VAC

This model performs in the higher temperature ranges for most head sizes. It is ideal for most materials including harder woods and rubber.

The WB400 provides branding temperatures from 925ºF up to 1255ºF depending on the head size.

* Ask your Hitt Marking Devices representative for specific recommendations.

Automatic Time Stamps
Automatic Date Stamps
Automatic Numbering Stamps

• Automatically imprints when paper is inserted

• Adjustable impact for multi-copy forms

• Automatic ribbon advance and reverse

• Durable brass type wheels

• Made in USA

• For printed record of time and date

Specify by catalog number. State type die wanted (design, figure, letter, round hole). Show exact die size (1/8", 1/4", etc.) State quantity needed. If receptable or finger ring is needed, specify separately on your order.

#5 Punch - 1-1/2" Reach
A heavy-duty utility punch used extensively for premium cards, ticket cancellation and quality control.

#12 Punch - 2" Reach
Used for automotive inspection, agriculture counts, and ticket cancellation.

#12-L High Leverage Punch
Used for validating plastic identification cards.

#12-E Standard Punch - 3" Reach
A lightweight long-reach punch for quality control and chart work.

#PC-4 Template Punch
A light long-reach punch used to design test-score templates and for programming industrial machinery using plastic control charts.

#13 Strap-Slot Punch
Cuts 9/16" x 1/8" strap-slot holes in plastic identification cards. This punch can also be equipped with larger special purpose dies and multiple characters, e.g. "VOID".

FINGERPRINT PADS - LI SERIES
Inkless Pads, Commonly Used by Banks, Mortgage Co., Notaries, Pawn Shops, etc.

LI-1
Hard porous plastic surface. Considered to be an "Inkless Pad" leaves a crisp, clear imprint, never smears, dries instantly and leaves no ink on fingers. Specially formulated, ink pad does not dry out if pad is left open.
- Size: 1-1/2" dia.
- Print capacity: 1200 imprints per pad

LI-1.5
Hard porous plastic surface. Considered to be an "Inkless Pad" leaves a crisp, clear imprint, never smears, dries instantly and leaves no ink on fingers. Specially formulated, ink pad does not dry out if pad is left open.
- Size: 2" dia.
- Print capacity: 1300 imprints per pad

LI-2
Durable porous plastic surface. Considered to be an "Inkless Pad" leaves a crisp, clear imprint, never smears, dries instantly and leaves no ink residue on fingers. Specially formulated, ink pad does not dry out if pad is left open.
- Size: 1-3/4" x 2-1/4"
- Print capacity: 1200 imprints per pad

LI-2.5
Ceramic surface. Considered to be an "Inkless Pad" leaves a crisp, clear imprint, never smears, dries instantly and leaves no ink residue on fingers. Specially formulated, ink pad does not dry out if pad is left open.
- Size: 2-1/2" dia.
- Print capacity: 4800 imprints per pad

LI-3
Ceramic surface. Considered to be an "Inkless Pad" leaves a crisp, clear imprint, never smears, dries instantly and leaves no ink residue on fingers. Specially formulated, ink pad does not dry out if pad is left open.
- Size: 2-1/2" x 4"
- Print capacity: 14,500 imprints per pad

FINGERPRINT PADS - LE SERIES
For Law Enforcement Use

LE-1
Ceramic pad surface utilizing a dark ink approved for use by law enforcement. Gives a dark, very clear, crisp imprint, leaving very little ink residue on fingers. Ink dries instantly and does not smear.
- Size: 1-1/2" dia.
- Print capacity: 1200 imprints per pad

LE-1.5
Ceramic pad surface utilizing a dark ink approved for use by law enforcement. Gives a dark, very clear, crisp imprint, leaving very little ink residue on fingers. Ink dries instantly and does not smear.
- Size: 2" dia.
- Print capacity: 1300 imprints per pad

LE-2
Ceramic pad surface utilizing a dark ink approved for use by law enforcement. Gives a dark, very clear, crisp imprint, leaving very little ink residue on fingers. Ink dries instantly and does not smear.
- Size: 1-3/4" x 2-1/4"
- Print capacity: 1200 imprints per pad

LE-2.5
Ceramic pad surface utilizing a dark ink approved for use by law enforcement. Gives a dark, very clear, crisp imprint, leaving very little ink residue on fingers. Ink dries instantly and does not smear.
- Size: 2-1/2" dia.
- Print capacity: 4800 imprints per pad

LE-3
Ceramic pad surface utilizing a dark ink approved for use by law enforcement. Gives a dark, very clear, crisp imprint, leaving very little ink residue on fingers. Ink dries instantly and does not smear.
- Size: 2-1/2" x 4"
- Print capacity: 14,500 imprints per pad

Ultraviolet Lamps & Fluorescent Inks

Hand stamping is a preferred method of readmittance control and beverage control at many amusement parks and nightclubs. A Blak-Ray ultraviolet lamp is used with readmission inks to regulate access. In the case of readmittance control, and attendant stamps the hands of patrons who wish to leave the premises and return a short time later. In the case of beverage control, patrons of drinking age typically have their hands stamps to differentiate them from minors.

Recommended Ultraviolet Lamps

The high-intensity model B-100AP is popular in high patronage clubs and for outside use in amusement parks. The B-100AP's patented Cool-Touch Lamp housing is safe to touch so patron's and personnel's fingers will not be burned. The Fingerguard is recommended for readmission use to avoid contact with the bulb.

UVP's high-quality, wide style XX-15BLB Lamp is designed to eliminate large access. This fixture can be conveniently mounted on a wall or hung from the ceiling. An optional clear filter cover protects the tubes. The XX-40 illuminates broader expanse.

The 6-watt UVL-56 used in conjunction with the J-129 lamp stand and the 4-watt UVL-21 with the J-124 lamp stand are popular for use at indoor establishments.

When complete portability is required, UVP's ML-49 6-watt lamp operates off two 6-volt lantern batteries (or two rechargeable batteries and charger), and the UVL-26P operates from its internal lead-acid rechargeable battery. For beverage control, bar personnel frequently use the convenient 4-watt UVL-4 lamp. This lightweight lamp is small enough to slip in a shirt pocket or carry on a cocktail tray. The UVL-4 operates off 4 standard AA batteries.
Blak-Ray Readmission Inks

Ordinary inks can be transferred to another person's hand or imitated with an ink pen. When confronted with a crowd at the entrance (or bar), readmittance attendants (or bartenders) using other control inks and methods can be less than thorough on their inspection techniques and admit (serve) people with forged stamps causing potential security problems. Blak-Ray lamps and inks help to eliminate that problem, allowing personnel to quickly and accurately inspect each stamp.

The UV Stamp is made to out last any other conventional rubber stamp when using UV Re-admission inks.

RIBtype® Products

When traditional marking solutions can't solve their problems, think of RIBtype® for large date and number stamps, an alternative to costly band stamps, and for text that changes.

Labels & Vinyl Lettering

We manufacture labels & decals using a variety of substrates & colors, with adhesive back or adhesive front. Most are supplied with permanent pressure sensitive adhesive, removable adhesive and static cling are also available. Please contact our customer service department for info & pricing. We have an in-house art department or will work from your supplied art.

"WORD BAND" LABELERS BY

contact ® | **USA**

CREATE YOUR OWN "IMPACT"

Promotional labeling helps consumers identify savings opportunities while increasing sales and profits for the retailer. Independent studies have shown that over 60% of customers purchase decisions are made from impulse while standing within 5 feet of the product. Through the use of promotional labeling retailers can attract the attention of their customers and trigger those buying emotions that lead to those impulse sales!

- Increased impulse sales through large bold attention getting slogans
- Increased profits through the sale of higher margin items
- Draw attention & create demand for new items and products on sale
- Blow out over stocked and slow moving inventory
- Eliminate the need for large inventories of custom labels with one labeler

"WORD BAND" LABELERS BY

contact® | **USA**

2216 & 2516 Premium

FEATURES & BENEFITS:

- Fast, simple drop-in loading (easiest label to load on the market)
- No need to peel labels during the loading procedure like other labelers on the market
- Virtually jam free (eliminates down time & repairs caused by label jams)
- Self-aligning drive wheel design
- Lightweight & extremely durable (lightest labelers on the market, reduces user fatigue)
- Quick change ink roller design for clean & simple ink roller changes
- Smooth slip resistant dial indicator for quick, precise number/slogan changes
- High quality print head provides clear, crisp label impressions
- Modular part design makes maintenance & removing rare liner back-ups a snap

CONTACT'S LINE OF WORD BAND LABELERS IS "WHAT EVER RETAILER NEEDS TO INCREASE SALES & PROFITS"

Word Band labelers come in both the Classic model and the "All-New" Premium model. They are available with label sizes of 22 x 16mm and 25 x 16mm. Both sizes offer 13 standard slogans on the top line with pricing capabilities on the bottom. The 2216 Word Band labeler comes with 7 numeric bands on the bottom row for all your pricing needs. The 2516 Word Band offers 6 larger bold characters for that increased eye catching ability.

HOW CAN CONTACT WORD BAND LABELERS HELP YOU SELL MORE AND SAVE MONEY AT THE SAME TIME?

They allow you to communicate a specific message at the point of sale to customers already inside your store. The best part is you accomplish this without the need of costly custom label inventory and with one model of label gun. You can even dial the top line to the blank space provided and utilize it as a standard price gun.

Sten C Labl®

With Sten C Labl®, you can mark, identify and address multiple cartons accurately, easily and economically. The need for expensive labels is eliminated. The system's "feather touch" enables you to make up to 50 clean, sharp impressions in just one minute on virtually any surface, even glass. Over 100 impressions can be made from each low-cost stencil. Stencils are available in a variety of sizes and configurations to meet you specific needs. The basic Sten C Labl® is a hand-applied multiple marker composed of three basic units.

The Stencil
Stencils are available in a variety of sizes and types. They can be ordered plain or "customized" with your company's name, logo, or any other repeating information.

The Durahead®
This simple, yet ingenious two-part applicator tool hold the stencil, stores and supplies the ink, and marks the package or product. The applicator consists of the Durahead® – a flat, durable ink pad framed in tough Delrin® plastic – and a screw-on, four-ounce ink container. The refillable container becomes both the handle and ink reservoir. There is also a curved (or rocker) applicator for heavy duty use. This applicator has its own ink reservoir and screw-on, custom molded handle.

The Ink
Ink flow is controlled by a patented ball valve system which ensures ink flow only when desired. This virtually eliminates over-inking, ink seepage and valve leaks. Inks are available in a variety of colors, although black is the most popular. Choose Standard Dry for marking porous surfaces, or Fast Dry ink for non-porous, non-absorbent surfaces.

How It Works

1. Create the Stencil
Information cam be hand written by ball point pen or prepared by typewriter, addressing machine, billing machine or computer. Stencils may be cut in the shipping room or storage area at the time of use. Or, if affixed to order processing paperwork, stencil preparation can be done as a by product of existing order preparation. Sten C Labls® can also be requested from your computer or office business forms supplier so that they become an integral part of these forms. This addition creates a complete forms package.

2. Attach Stencil to Applicator
To attach the prepared stencil to the special Durahead® applicator, start by removing the backing paper. Then lay the stencil face up – on a smooth surface and gently and evenly press the inked applicator to the stencil. The natural adhesion from the ink's moisture will hold the stencil in place. The applicator screws on to a four-ounce bottle of ink which serves as the handle and ink reservoir. It's as simple as that. You're now ready to begin multiple addressing or marking on surfaces ranging from cartons and poly bags, to glass, plastics, wood, and oddly shaped items.

RUBBER SAND BLAST STENCILS

HITT rubber masks are molded from natural or synthetic rubber. The masks are relieved with stencil style lettering along with special designs or trademark logos. Ideal for identification marking of tempered or laminated glass. Within seconds your mark is permanently etched into glass, metal or plastic. Marvel rubber masks are very durable for long life, keeping the cost per etch extremely low. Our standard mask size is 3" x 2" or 2-1/2" x 2-1/2". We can produce other mask sizes to your specifications. Lettering height starts at .060 and up. Rubber masks can be used to mark various shapes such as flat, curved, tubular, convex or concave. Please call or email us for more information and samples.

Rol-It-On® System Stencil Applicators For All Surfaces

Our most economical stencil applicators system for marking on both porous and non-porous surfaces. Use the refillable Rol-It-On ink pad to ink the roller prior to stenciling.

- For porous surfaces use a latex roller and R ink or use a Type N Roller with SK-1 ink
- For non-porous surfaces order a neoprene Type N roller and S or GS ink.
- Use the GS Kit to meet U.S. Government specifications when stenciling on porous or non-porous surfaces.

MARK-HITT TWO-PART EPOXY INK

Surfaces: Ceramics, phenolics, polyesters, melamines, silicones, ferrous and non-ferrous metal, glass, electronics.

Drying Time: Air dry from 2-3 hours. Curing time can be speeded up by adding heat. 7 to 10 days required for maximum adhesion, and chemical resistance. Require addition of a catalyst immediately prior to use.

Characteristics: Meets Spec. MIL-I-43553. A two-part epoxy ink with a high degree of adhesion to the most difficult surfaces. Becomes permanent after curing. Excellent resistance to solvents and chemicals.

Colors: Black, White–1/2 oz. packets, quarts available. Other colors available on special order.

Applications: Especially formulated for the electronics industry for use with Markem, Prenco, Rezafix, Jan Tech, Mark & Pack, Eastern and other parts marking machines. May also be applied with a rubber stamp by rolling out a thin film of ink with a brayer on a smooth surface.

MARK-HITT INVISIBLE STAMP INK

Surfaces: Skin–Usually hands.

Drying Time: Instant.

Characteristics: Ink is made so that it will show up only under a Black ultraviolet light. Used for identification purposes at dances, pools, private picnics, etc.

Colors: Blue–when put under light.

MARK-HITT No. 214 STAMP INK

Surfaces: For stamping semi-absorbent and non-absorbent surfaces such as glossy paper, painted surfaces, metal, hardwood, electronic parts.

Drying Time: 30 to 60 seconds.

Characteristics: Good adhesion, non-acid, waterproof...Approved by Dept. of Agriculture for use on food packages.

Colors: Black, Blue, Red, Purple, White, Yellow, Orange, Green and Brown.

MARK-HITT STAMP INK THINNER #141

For: #141, CELLOPHANE, INDELIBLE, A. X., OPAQUE, #628, #214, or any ink used with opaque pads.

Characteristics: These thinners have the same solvents used in each particular ink. Only the color is eliminated. Will rejuvenate the ink or pad and will bring it back to its original state and drying time. Can also be used for cleaning rubber stamps.

MARK-HITT PARACHUTE INK #6903

Surfaces: Nylon parachute cloth, parachute pack cloth and webbing.

Drying Time: Within 10 seconds after stamping on material.

Characteristics: When applied with rubber stamp, will produce a sharp legible impression, indelible. Meets Gov't. Spec. MIL-I-6903.

Colors: Strata Blue, Orange-Yellow, Red, Black.

MARK-HITT METAL MARKING & STENCILING INK

Surfaces: For marking and stenciling iron, steel drums, boilers, sidewalks, and any painted or non-absorbent surface.

Drying Time: Will set to touch in 5 minutes. Will dry in 10 to 15 minutes.

Characteristics: To be used with ordinary pot and stencil brush. Can be prepared for use in fountain brush if order is made to read "Metal F.B.". Ink has good adhesion, is rub resistant and waterproof. Gov't. Spec. TT-I-558 and MIL-I-1795A Type I.

Colors: Black, Red, Blue, Green, White, Yellow, Orange, Brown, Silver. Matched and Gov't. colors can be made to order.

MARK-HITT INDELIBLE INK

Surfaces: Absorbent surfaces, linen, hosiery

Drying Time: Almost immediately, depending on absorbency of material.

Characteristics: Will withstand many washings. Can be used with rubber or metal stamp or stencil if used sparingly.

Colors: Red, Blue, Green, Purple, Yellow, White.

MARK-HITT No. 245 STAMP INK

Surfaces: Any non-absorbent material. Very good for all types of cellophane.

Drying Time: 3 to 5 seconds.

Characteristics: A very fast drying ink that has excellent adhesion on most non-absorbent surfaces. Makes sharp impressions that are very rub resistant. Good for production line work because of its quick drying characteristics and ability to adhere to a wide variety of materials. Approved by Dept. of Agriculture for use on food packages.

MARK-HITT No. 628 POLYETHYLENE STAMP INK

Surfaces: Treated Polyethylene, plastics, metal and most non absorbent surfaces.

Drying Time: 5 to 10 seconds.

Characteristics: Quick drying, waterproof, EXCELLENT ADHESION. Very good on hard to mark polyethylene. Comes in vivid pigmented colors. Will not migrate through plastic. Conforms to Gov't. Spec. Mil-I-16557 a type 1. Approved by Dept. of Agriculture for use on food packages.

Colors: Black, Red, Blue, Green, Yellow, White, Orange, Purple, Brown, RED conforms to Gov't. Spec. TT-I-554A.

141 INDUSTRIAL INK

Surfaces; Porous, Non-Porous, Paper, Corrugated, Plastic, Metal

Application; Hand Stamp

Dry time; 2-4 minute

The 141 ink is a waterproof ink with excellent adhesion. Because of the slow drying time, the ink remains moist on a pad for a longer period of time. It is especially good for inspectors ink pads and is suitable for self-inkers. It is approved by the Department of Agriculture for sue on food packaging. **Colors:** Black, Blue, Red, Yellow, Green, Orange, Pink, Silver, White.

MARK-HITT INDELIBLE LAUNDRY INK

Surfaces: Used with pen, rubber stamp or stencil for marking linen and clothing.

Drying Time: Almost immediately–Depending on absorbency of material.

Characteristics: Acid base. Will not bleach out, no preparation or hot iron required, can be washed immediately after marking. Not to be used on top of sizing. Gov't. Spec. TT-I-542.

Colors: Black.

MARK-HITT 476 SOLVENT RESISTANT INK

Surfaces: Metal parts, plastic parts, printed circuit boards, glass.

Drying Time: 30 to 60 seconds depending on surface.

Characteristics: Made to resist solvents such as degreasers, alcohol, cleaning fluids, etc. The longer this ink is allowed to dry, the more resistant it will be to solvents.

Colors: Black, White, Yellow, Red, Orange, Green, Blue, Purple.

MARK-HITT No. 1250 INK

Surfaces: All non-absorbent surfaces such as metal, cellophane, foil, resin coated photographic paper, mylar, chrome coated labels, food packaging.

Drying Time: 10 to 15 seconds

Characteristics: The ink specifically formulated for use on the Mark II stamp pad. An excellent all purpose ink. Waterproof, excellent adhesion, USDA approved for food packaging. Conforms to Gov't. Spec. TT-I-1795A, Type I, when a stamping ink is required. Also Meets Spec. MIL-16557A, Type I.

Colors: Black, Blue, Red, Purple, Green, Brown, White, Yellow, Orange, Silver.

NOTICE: While the manufacturer takes utmost care in compounding & manufacturing these inks, we cannot guarantee their performance.
All Inks are sold with the understanding that our liability with respect to any defective ink is limited to the replacement of the ink.

TT-I-521
INK: COPYING AND RECORD - shall be of blue-black type - suitable for writing permanent records - not recommended for making more than one press copy, nor for use in fountain pens, nor for other ordinary purposes.

TT-I-526a
INK: DRAWING (FOR GLAZED SURFACES) - Drawing inks covered by this specification are intended for use on plastic surfaces, such as celluloid, cellulose acetate, and vinylite and are applied by pen or brush.

TT-I-528B
INK: DRAWING, WATERPROOF, BLACK - This specification covers black, waterproof drawing ink for general drafting use (drawing and tracing).

TT-I-540
NUMBERING MACHINE INK - Ink suitable for use with hand operated, selfinking numbering machines having a felt inking pad and metal type.

TT-I-542
INDELIBLE LAUNDRY INK - indelible ink for marking fabrics, ink suitable for use in a power-operated laundry marking machine, for marking impressions with rubber stamps, and for marking with pen points.

TT-I-544
MARKER, FELT TIP - This specification covers dry marking ink for use with felt tip fountain type markers on porous and non-porous surfaces. - Intended for use in felt tip marking pens for freehand marking, writing, or drawing on materials such as fiberboard, paper, wood, burlap, or metal.

TT-I-545a
MARKING INK, QUICK DRYING, FOR PHOTOGRAPHIC FILM - This ink is intended for marking cellulose acetate base film. - Ink shall not etch the film.

TT-I-547a
NUMBERING MACHINE INK FOR PHOTOGRAPHIC NEGATIVES - The numbering machine ink covered by this specification is intended for use in marking on the uncoated side of photographic negatives.

TT-I-554a
STAMP PAD INK, RED, FOR PHOTOGRAPHIC PRINTS - For stamping from a pad, clear, legible impressions on the face of photographic prints. - Shall be dry in not more than 15 seconds.

TT-I-556d
QUICK DRYING RUBBER STAMP INK - For making impressions on paper or corrugated with a rubber stamp.

TT-I-557
INK; STENCIL, DUPLICATING MACHINE, CLIMATEPROOF, BLACK, CASTOR OIL BASE - The ink shall work satisfactorily in rotary stencil duplicating machines, and shall produce impressions which can be easily read when printed on one or both sides of the specified paper.

TT-I-558c
MARKING STENCIL INK, OPAQUE, FOR NONPOROUS SURFACES (METAL, GLASS, ETC.) - The ink covered by this specification is a light and water resistant, fast drying, flat finish stencil ink for marking metals, glass, stone and similar nonporous surfaces. - It is intended primarily to be used with an ordinary wood handle stencil brush and stencilboard. - It may also be used with a hand lettering brush or may be applied by spray or roller coater.

TT-I-559
STENCIL INK: OPAQUE, FOR MARKING POROUS SURFACES (WOODEN BOXES, FIBER CARTONS) - This specification covers weather-resistant, fast drying, flat finish inks of the type used for marking fiberboard cartons, wooden crates, boxes, bales, sacks and burlap porous materials used as shipping containers and for other purposes. - It is suitable for application through a perforated and/or machine cut metal, plastic, or oiled-paper stencil board, primarily with a brush of either the fountain or ordinary wood handle type.

TT-I-560
INK; STENCIL, DUPLICATING MACHINE, BLACK, FOR USE ON TWIN CYLINDER EXTERNALLY INKED STENCIL DUPLICATING MACHINES - This specification covers mimeograph ink for use on twin-cylinder externally inked duplicating machines in the stencil duplicating process.

TT-I-564
INK: STENCIL, DUPLICATING MACHINE, BLACK
Type I - Oil Base Ink, Climateproof - Intended to give satisfactory operation under all climatic conditions.
Type II - Emulsion-Base Ink - Inks. They are the water -in-Oil emulsion type inks. They are all-purpose inks which dry rapidly with a minimum of offset or strike-through on mimeograph papers and will give impressions with a minimum of offset on hard-sized papers.
Type III - Hard-Set Ink - Are hard -Set Inks which give you clean, clear impressions on hard-sized papers, smudge-proof when dry and are not affected by water.
Type IV - Fast-Drying Ink (Water Soluble) - Inks which dry on contact with the paper. They should operate well on hard-sized papers. This ink will operate satisfactorily only in closed cylinder machines.

TT-I-600a
INKING PAD, RUBBER STAMP - This specification covers fabric, wooden, and foam latex rubber or foam plastic pads, without ink or with ink, in three sizes, for use with rubber stamps in general office use.

TT-I-1795A
INK, MARKING, STENCIL, OPAQUE POROUS & NON-POROUS SURFACES
Type I -non-porous surfaces - Metal Marking Ink
Type II - porous surfaces - OB Ink
Type III - porous & non-porous surfaces in spray cans -Types I & III stencil inks are a light and weather resistant, fast drying, flat finish for marking metals, glass, stone and similar non-porous surfaces intended to be used with stencil brush, hand lettering brush, roller coater, spray and stencil board - Types II & III stencil inks are weather resistant, fast drying, flat finish for marking fiberboard cartons, wood crates and boxes, bales, sacks and burlap and similar porous surfaces. - Intended to be used with same as above.

MIL-I-3218
MEAT STAMPING INK - Specification covers ink to be used for stamping inspected meat.

MIL-I-6903c
INK, MARKING, PARACHUTE - The ink covered by this specification is intended for marking parachutes and other items of cloth construction. -Impressions on nylon shall dry within 5 seconds after stamping.

MIL-M-7911
MARKING, IDENTIFICATION OF AERONAUTICAL EQUIPMENT, ASSEMBLIES AND PARTS - Ink requirements for identification of all equipment, assemblies, and parts for aircraft. - The marking shall be as permanent as the item on which it is placed. - Used on electronic and electrical parts.

MIL-I-15883A
