| Cast acrylic have thickness variations that may present difficulties in applications where thickness tolerance is important (i.e. fitting into extrusions, thermoforming applications where walls must maintain uniform thickness and assembly of complex structures). Check gauge when non-contact engraving takes place and to periodically re-check focal lengths when laser engraving. Multiple passes may be required when lasering certain gauges.

Rowmarkably Simple.
Rowmark’s Color Snap Match App

Rowmark’s NEW color match app allows you to snap a photo, select a color and instantly match your project colors to Rowmark products… anywhere!

- Quickly receive expert suggestions on the best Rowmark products for your project based on color and product features.
- Directly request samples of product matches.
- Access to Pantone®, CMYK, RGB & HEX color information on product matches.
- Can’t find what you are looking for? Submit a custom color match directly from the app.

$15 VALUE

REQUEST A FREE COPY OF OUR SAMPLE MATERIAL KIT.

Test Rowmark’s new and popular products for laser marking, rotary engraving and UV Printable today! Each kit includes a Color Chart, several plastic samples and helpful fabrication tips and tricks.

Request your FREE kit today at samples@rowmark.com!
### TECHNICAL SPECIFICATIONS

**Material**
- Microsurfaced ABS

**Finish**
- Matte non-glare
- Patterned

**Sheet Size**
- 24.75" x 48.6875" // 629mm x 1235mm

**Usage**
- Interior signage
- Personal identification
- Trophies, Awards & Plaques

**Capabilities**
- Saws
- Drills
- Bevels
- Thermal Prints
- Sandblasts

**Engraving Depth**
- .003" // 0.08mm

### TECHNICAL SPECIFICATIONS

**Material:**
Microsurfaced cell cast acrylic for reverse engraving

**Finish:**
Matte (M) Gloss (G)

**Usage:**
Interior signage Exterior signage Personal identification Trophies, awards & plaques Tactile signage (matte only)

**Capabilities:**
Saws Bevels Hot Stamps Paintfill UV Stable Braille-engravable Laser Vector Cuts Screen Prints Fine Detail Back-lighting*

---

*Cast acrylics have thickness variations that may present difficulties in applications where thickness tolerance is important, i.e., fitting into extrusions, thermoforming applications where walls must maintain uniform thickness and assembly of complex structures. Check gauge when non-contact engraving takes place, and to periodically re-check focal lengths when laser engraving. Multiple passes may be required when lasering certain gauges.*
