ACMI #100 / GROCERY INK
NON-POROUS
STAMP PAD INK
BOTTOM CODING

ACMI #100 was formulated for rubber stamp marking plastics, metals, glass, film, foil and other nonporous substrates from a stamp pad. #100 is also used for bottom coding on aerosol containers and small plastic, glass and metal non-aerosol containers. It is used to price all frozen food packages. This ink dries fast and is able to print through moisture.

SPECIFICATIONS:

Applications:	Rubber stamp with cloth covered felt stamp pad, stick stamp, band stamper, air sprayer, roll coder, flexographic printer, and inline high speed automatic machine for bottom coding.
Viscosity:	15 cps (#100H is a higher viscosity #100)
Specific Gravity:	0.98 - 1.07
Weight per Gallon:	8.17 - 8.92 lbs.
Flashpoint:	46° F.- 74° F. depending on color
Dry Time:	7-10 seconds
	Variations in temperature, humidity & film thickness affect dry time.
Shelf Life & Storage:	Use within 1 year is recommended. Ink should be stored at normal room temperature and capped tightly after each use.
Chemical Base:	Solvent
Colorant Base:	Dye
Reconditioner	#100 Reconditioner
Colors:	Black, White, Violet, Red, Blue, Green, Yellow, Orange, Brown, Pink, Gray
Availability:	Pints, Quarts and Gallons
	Smaller sizes available on request (minimums apply)
